

Plastifloor® acrylic resin floor

For extremely durable surfaces in the agricultural sector

Nowadays, Plastifloor® acrylic resin floors are the quality and safety standard in agricultural businesses.

The place where our food is made represents the place where the chain of food security begins as well. We all wish to buy natural, clean products, produced under excellent hygienic conditions. Today, consumers place great emphasis on a species-appropriate keeping and ethical treatment of farm animals. It has been confirmed that products from businesses with sustainable production methods that pay careful attention to freshness, hygiene as well as cleanness are able to sell their products at better prices. Right here, Plastifloor® flooring systems support today's modern farmer. With their help, hygiene in the barn, in the milking parlor and during the storage of fresh food becomes the standard of his product quality. Non-slip coatings without gaps on floors and walls facilitate the daily work and reduce the risk of accidents. The feed is "served" on surfaces that are easy to clean and don't need much care – this is what today's cow barn looks like.

The advantage of the usage of our Plastifloor® acrylic resin floors is at hand: The new floors are fast to install, harden even within one milking cycle, are acid and alkali resistant and endure extreme loads and stress in the long term.

Don't hesitate to seek our advice. We would be very happy to submit you an offer for the delivery and the installation of your new Plastifloor® floor.

The forage area made of Plastifloor® acrylic resin floor is easy to clean.
